

Senior Developer

Facilitate Digital is a leading global provider of digital marketing technology and services to the digital media sector. Established in 2001 and headquartered in Sydney, Australia, Facilitate Digital has a global footprint spanning Sydney (HQ), Shanghai, Singapore, London, Stockholm, Hamburg, NYC, San Francisco & Auckland.

Responsibilities

- Understanding the business issues and data challenges of the products
- Creating technical and functional design specifications
- Creating well designed, reusable objects and schemas
- Defining and communicating coding standards
- Assisting in definition of project deadlines and schedules

Requirements

- Expert knowledge of C# ASP.NET with 5 years+ experience
- Advanced knowledge of SQL 2000/2005
- Significant knowledge of internet systems architectures

Successful candidate will be entrepreneurial in their outlook, self-starters looking to rapidly acquire knowledge and make a significant contribution to the team from the outset. This role will offer the right candidate an excellent opportunity for personal growth.
